# WE ARE THE AHMERKAMP-GROUP

## USING EXPERIENCE

2 Founded in 1964, the Ahmerkamp-Group is one of Germany's leading timber wholesalers and importers, with locations in Vechta (headquarters), Taucha/Leipzig, Everswinkel, and Langenhagen. Ahmerkamp Vechta specializes in decorative interior fittings. All four locations are linked through an innovative logistics program, forming a large, interconnected warehouse network supported by a modern fleet of vehicles. This setup ensures close proximity to customers while maintaining optimal product availability. Through this innovative logistics system – which also includes our own direct import warehouses in major European ports – just-in-time deliveries and express shipments for urgent product ranges are a matter of course.

Fast product availability is the norm for Ahmerkamp customers. Specialized products such as Nanotec or foil-coated surfaces offer unlimited design possibilities. In addition to decorative boards, Ahmerkamp offers a wide range of solid wood panels, plywood, and multiplex boards. For exceptional furniture designs, we also provide logs and sawn timber, inspected and ordered directly by our highly qualified Ahmerkamp employees at the sawmill. Of course, chipboard, HDF, and MDF are also available, along with door and flooring assortments and a comprehensive selection for renovation, timber construction, and outdoor projects.

To provide customers with a design-oriented and unique product range, the Ahmerkamp-Group focuses on developing strong proprietary brands. This enables craftsmen to impress their clients not only with well-known interior design brands but also with exclusive top-range collections at highly competitive prices.

**Realizing living concepts holistically**  
– that's Ahmerkamp's mission.

Our customer-oriented philosophy extends far beyond product range and logistics. For example, our in-house graphics department designs custom advertising campaigns and supports exhibition planning. Specially trained employees

assist with the execution of special orders. Workshops and trade events provide detailed insights into new products, processing methods, and evolving design trends.

Ahmerkamp also invests in education and training, ensuring the continued development of young talent within the timber industry.

## GENERATIONS OF KNOWLEDGE

Founded in 1964 as a small sawmill, the Ahmerkamp timber business has evolved over just a few decades into a powerful, internationally active wholesale enterprise with global connections.

Our headquarters, located on Oldenburger Straße in Vechta, covers around 100,000 m<sup>2</sup>. From here, we deliver to timber processors and dealers with our own trucks and reliable forwarding partners.

With an extensive inventory covering sawn timber, joinery and planed goods, construction materials, boards, and doors, we meet every market demand. Our key success factors include global sourcing of high-quality products, an innovative logistics system, and the professional expertise of our staff. Long-term investments in modern facilities – such as a fully climate-controlled warehouse and a high-performance vacuum dryer – complement our offer.

**The foundation of our company lies in the multi-generational expertise of the Ahmerkamp family. This guarantees continuity and innovation for our customers – now and in the future.**

## WORLDWIDE QUALITY

In segments such as raw plywood and film-faced plywood, we meet our customers' strict quality requirements through close, reliable cooperation with suppliers worldwide.

Our decades-long presence in global markets allows us to offer a wide selection, premium quality, competitive prices, and short delivery times – whether for fiberboards from South Africa or Argentina, plywood and laminates from Indonesia, the USA, Canada, Romania, or Slovenia, or parquet flooring from Malaysia or France.

From Poland to South Africa, Indonesia to Argentina – our experienced buyers are at home on every continent in pursuit of premium quality.

# OUR CERTIFICATIONS

## RAL QUALITY SEAL

This seal is awarded by the RAL Quality Association for Wood and Building Materials Trade e.V., recognized by RAL as the umbrella organization for certifying quality associations in Germany. Introduced in 2023, the RAL “Sustainable Trade in Wood and Building Products” quality seal certifies and promotes:

- 6
- > Fair business practices
  - > Responsible resource management
  - > Implementation of energy-saving concepts
  - > Support for sustainable mobility behavior
  - > Employee-friendly working conditions
  - > Fair treatment of staff

Since November 15, 2023, the Karl Ahmerkamp Group has proudly held this RAL certification – assuring customers that we are committed to conserving resources and practicing sustainability in all business areas.

Do you have questions about the RAL Quality Seal “Sustainable Trade in Wood and Building Products”? Visit the RAL Institute or the Quality Association for the Wood and Building Materials Trade e.V. online – or simply get in touch with us.

## RELIABLE

Our entire logistics chain is coordinated from start to finish by experienced, qualified personnel, ensuring reliable delivery from anywhere in the world.

Experienced staff and state-of-the-art technology guarantee smooth internal processes. A perfectly coordinated logistics network ensures constant product availability – just as our customers expect.

To guarantee timely, reliable deliveries, we collaborate with long-term forwarding partners and operate a large fleet of our own trucks.

This enables safe, seamless transportation and transparent delivery tracking at all times.

## SERVICE + LOGISTICS

**Meeting and maintaining our customers' expectations is our top priority.**

By investing in a fully automated panel warehouse at our Vechta site, we've taken a major step toward fulfilling that goal.

12

Our high-efficiency logistics system is the ideal solution for handling decorative and coated panel materials – with automated bundling, dedicated picking areas, and a separate loading zone that ensures gentle material handling.

## **ADVANTAGES**

- > Over 400 decorative designs covering more than 20,000 m<sup>2</sup> of storage space.
- > Exclusive use of premium brands: Pflaiderer, Kaindl, Europlac, and Fundermax.
- > No scratches or damage from conventional stacking.
- > Each order includes protective panels top and bottom.
- > Optimized inventory management for fast availability.
- > Reduced CO<sub>2</sub> emissions and improved environmental footprint.

# WAREHOUSE 9 KVH SYSTEM

## SUSTAINABLE PRODUCTION AND INNOVATION

**To provide sustainable products sustainably, we developed an automated, energy-efficient warehouse for KVH, BSH, and laminated wood panels.**

During the development phase with our machinery partner, it became clear that such a system did not yet exist. We therefore applied for funding from the Federal Ministry for the Environment, Nature Conservation, and Nuclear Safety (BMU) under the Environmental Innovation Program. This innovative process saves up to **83 % CO<sub>2</sub>** and reduces packaging waste – while boosting productivity.

We gratefully acknowledge the support of former Federal Environment Minister Dr. Barbara Hendricks, who approved our application.

**Step 1:** Planning the construction and transferring the data to Ahmerkamp

**Step 2:** Importing your data, including all position numbers, into a length optimization program and forwarding it to the central control system

**Step 3:** Package formation and release of the order

**Step 4:** Automatic package formation

**Step 5:** Applying labels with all necessary information: dimensions, component number, and quantity of parts available in that length

**Step 6:** Wrapping the package for further transport

**Step 7:** Applying a package label at the center of gravity and preparing the order for shipment

**Step 8:** Loading the goods for transport to the respective destination

14

**Would you like to take a look for yourself?**

Then visit our YouTube channel and see for yourself.

## FACTS

- The hall area measures 24 x 120 m
- 487 storage spaces for 1000 m<sup>3</sup> of KVH (from 7 to 13 m), BSH (from 8 to 13,50 m) and Glued wood panels (5 m length)
- The dual crane tracks with vacuum sorting robots are **an innovation** in this configuration. One full cycle takes 93.5 seconds: two beams are brought to the center of the warehouse, and on the return path, two others are picked up and placed to form a picking package.

# WAREHOUSE 10 TIMBER FRAMING MACHINE

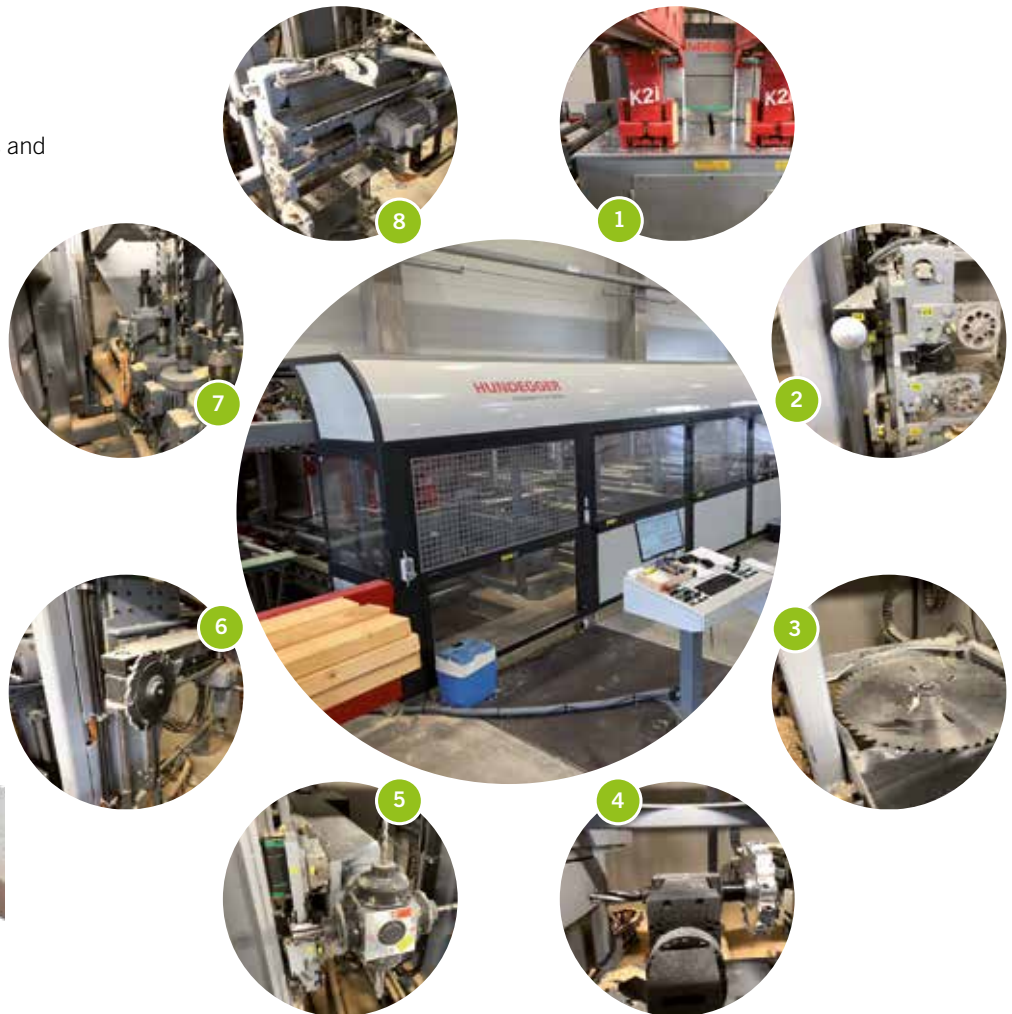

## K2I

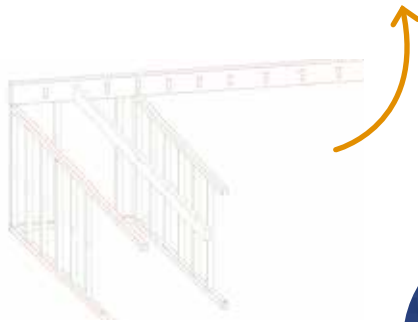

- Step 1:** Positioning carriage
- Step 2:** Horizontal drilling units and slotting machine
- Step 3:** Horizontal saw
- Step 4:** 5-axis universal milling machine
- Step 5:** Revolver milling machine
- Step 6:** Stop board milling machine
- Step 7:** Vertical drilling units
- Step 8:** Swiveling drilling unit

16

Dovetail joint with approval

## SC-3 (SPEEDCUT)

- Step 1:** Horizontal drilling units
- Step 2:** Revolver milling machine
- Step 3:** Gripper carriage
- Step 4:** Pivoting cross-cut saw
- Step 5:** Vertical drilling units
- Step 6:** Waste wood removal (conveyor belt)

### FACTS

- > The hall is 35 meters wide and 50 m long, plus two lean-to roofs measuring 5 m deep and 50 m long.
- > Maximum availability – fast and precise
- > From conservatories with small cross-sections to glulam beams and cross-laminated timber elements measuring up to 300 x 1.250 mm
- > Optional additional milling and drilling operations available

# OUR OWN BRANDS

Photo: © stock.adobe.com

## OUTDOOR

With our in-house brands, we offer products that meet the highest quality standards at the best prices. From structural timber to system products such as wood fiber insulation panels, Ahmerkamp delivers directly to workshops or construction sites. Our in-house engineer provides expert advice on all aspects of detailing and processing.

Our garden brand THEVAgarden ranges from decking to design privacy screens – standing for exclusivity and quality, combining the natural charm of wood with modern materials like glass, WPC, and aluminum.

18

## INDOOR

Ahmerkamp wood-based materials offer diverse possibilities for sustainable and economical building – both structurally and aesthetically.

Our flooring program features hand-scraped planks, durable vinyl flooring, and other exclusive designs sourced worldwide. Our AVETHi brand offers a complete range of door designs.

# MARKETING AT AHMERKAMP

## EVERYTHING ABOUT PRINT MEDIA

Ahmerkamp supports its customers with a comprehensive marketing program. Our in-house design team produces brochures, advertisements, flyers, and other print materials tailored to each client's corporate design. We also provide photo material, assist in showroom design, and offer product modules for trade fairs or open-house events.

Marketing materials include:

- > Exhibition support
- > Brochures/flyers
- > Ads
- > Direct mailings

Customers can even create customized brochures, selecting the exact product ranges most relevant to their business.
